Lineage 2 classic fast leveling guide

Lineage 2 Essence Brings Classic Lineage To Players (SPONSORED) Lineage 2 Essence is an alternative version of the legendary Lineage 2, and it brings with it many quality of life features to help a busy MMO player stay engaged. Read the full story here Important Points (READ) 1- Pick up EVERYTHING you get, or everything you see valuable in the ground. Many people said that Adena drops are horrible, but picking up your adena drops, you should have enough adenas for life.2- Play safe, Sitting regens more HP/MP that being on foot, type /sit to sit (obviously) and /stand to get back up.3- Always check your passive skills when you level up a few 10 levels or so. I'll place the Rank levels but you still should check when your rank upgrades to get better gear at town.4- Always carry the best HP potions you can find. No matter how expensive they are, HP potons are life savers. Even on my lv 89 main I use them a lot. Mid fight you cant sit to regen Hp, so those pots are always there for your aid. They are very valuable to keep, so always keep a nice supply of them and shots to boost your attack.5- DO RAID BOSSES. RB's have great XP rates (A really good one may even rocket you up 2 levels or more) and the drops they give are quite good too. In higher levels the drops you get can easily be sold or auctioned for lots of adena, even millions.6- USE COMMANDS! Commands can be VERY useful on certain enemy hunts. For example, you need to hunt a Dust Dragon in Dragon Valley, but you cant find any. Type /target (enemy/npc/player name) and the game will target any nearby entity with that name close to you. You can also put up something like /target b and the game will target the closest thing to you that has a B in its name.7- Force Attacks. Some attacks cant be used on NPC's or Players, but if you hold Control (Ctrl key) and press the skill you want to use, as long as it doesnt debuff or cause malicious effects, you will be able to use it on town against NPC's. If your outside town, you can use this to forcibly attack players.8- Be Cheap. Attacking from the back of your objective gives both a higher damage and a higher chance of hitting criticals, also, players that use shields wont be able to defend from this unless they have Shield Aegis active (Allows to defend from all directions) Higher chance of inflicting status effects.9- Dont waste equipment. The steel equipment the game gives you can be returned for more Steel Door Guild Coins, which will give you more free Shots.10- Vitality. Vitality (Vitality Points [VP] or Vitality Bar [VB]) is a bonus that gets refilled every wednesday at 6:30 AM. It gives 200%+ experience to the player. The higher the xp the enemy gives, the faster it runs out. Subclasses/dualclasses have a different bar, so if you run out of VP with your main, you can change to a subclass and you'll have another bar to blow through. 11- PvPer's. If you see a PvP player (Name will be purple or flashing purple) Dont attack him, unless he attacks you. Or you see he's weakened and you are 100% you can beat him in case your feeling strong. 12- PK's. If you see a PK (Player Killer, name will be in various shades of red, brighter will mean he/she has killed more) run away. Unless he's resting or visibly AFK. Killing a PK gives you a green name. Sometimes, PK's arent really PK's, but BK's (Bot Killers) They will stand close to you and examine the way you move and attack, spamming the same attack and doing the same thing only picking herbs will lead them to think your a bot. So use different attacks, pick up everything, and simply say "Hello", and they will leave you alone. (Only apply if you notice them standing there, if you see them coming, run anyway and ask via PM if they are bot killers, if they dont answer, then your probably doomed) 13- Cursed Swords if you ever find these fine gentlemen over here named Zariche and Akamanah, run away. The Cursed Sword owners kill players for fun as the swords literally NEEDED to kill players, unless you are 90+ and/or a Hero. Both Cursed Sword Owners lower Heroes's CP down to 0 if they engage in a fight. 14- Heroes Heroes are the players of each class that win the most points in the Grand Olympiad. They have a special effect around their bodies that looks like Fireflies circling around them constantly. They can be considered the most powerful players in-game. They also lower Demonic Sword Zariche's and Blood Sword Akamanah's CP to 0 in case they engage in a fight 04.06.2012: Player Questions Attention new players (and veterans too)!
