For a better experience, please enable JavaScript in your browser before proceeding. It may not display this or other websites correctly. You should upgrade or use an alternative browser. Took it apart to clean, now something is wrong I have put it back together but somethings not right. The paper light flashes orange. Is there a service manual available that would tell me how to do this stuff. Thanks KDC On one occasion when I reassembled it I got the same flashing lights as you. Turns out that I had failed to plug in one of the cables I had previously disconnected. Plugged it in and it worked perfectly once again. Im not positive about the gears but I did not do anything special with those. On one occasion when I reassembled it I got the same flashing lights as you. Turns out that I had failed to plug in one of the cables I had previously disconnected. Plugged it in and it worked perfectly once again. Im not positive about the gears but I did not do anything special with those. It knows the duplexer is there I think it does. Any ideas It knows the duplexer is there I think it does. Do you mean when you print duplex that the duplexer doesnt work. Or, does it just not tell you anything. If the former, it is probably software. I have a document or two that insist on printing all the front sheets, then have me turn the paper around and reinsert in the tray and then it prints all the back pages. This is actually much faster than having to wait as the duplexer does for a specific time before printing the back of the page. Anyway, in my case it is obviously software even though I cant find anything in that one document since other documents use the duplexer correctly. So be sure you defaults are set as you want before you decide that the printer isnt working correctly. Good luck. Do you mean when you print duplex that the duplexer doesnt work. Or, does it just not tell you anything. If the former, it is probably software. <http://www.esfpraktijk.nl/uploads/canon-ir2000-service-manual-pdf.xml>

I have a document or two that insist on printing all the front sheets, then have me turn the paper around and reinsert in the tray and then it prints all the back pages. This is actually much faster than having to wait as the duplexer does for a specific time before printing the back of the page. Anyway, in my case it is obviously software even though I can't find anything in that one document since other documents use the duplexer correctly. So be sure your defaults are set as you want before you decide that the printer isn't working correctly. Good luck. I also tried reinstalling drivers, and tried the printer on a totally different computer, same results. Really need that HP expert to comment, if he knows something to try. Maybe I staticed the chip that handles duplex who knows. After that, you can post your question and our members will help you out. If you're having a computer problem, ask on our forum for advice. Please use the Enquiry button to submit a ticket for us to check its status for you. Please use the Enquiry button to submit a ticket for us to check its status for you. A contradiction between any of those data sets can happen in the event your fresh driver overlaps any number of the data sets which can be recently used on one of your older drivers. This kind of collision is usually remedied just by renewing the driver, and possibly by removing the most recent driver and then reinstalling it once again. Hewlett Packard Deskjet 970cxi Driver, along with other drivers, has to be rejuvenated systematically for them to sustain the respective hardware devices at virtually all times. Thus it is actually vital to sustain your drivers up graded. Experienced laptop computer operators might find it hard to update two or three drivers manually.

Even so, for your unproficient operator, a far more realistic course of action would be to prevent the almost endless hours of tracking down the numerous updated models of the driver online, and the likely hazard related to installing drivers that are not a proper match to your systems configuration, and choosing the commercial automatic driver installer. At any device provider website hundreds and maybe thousands of drivers are available all relates to any particular laptop os construction, in addition to a proper model of a hardware device it relates to. Selecting the suitable proper match up Hewlett Packard Deskjet 970cxi Driver is essential, simply because installing yourself an incorrect driver will probably harm ones workstation sometimes much worse. The driver instal program enable you to bypass having to coordinate every single driver to a persons personal computer, simply because it performs this task automatically on a commercial standard. Do you have any questions regarding your driver installation. Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein. If you do not know whether the outlet is grounded, check with a qualified electrician. Replace damaged cords immediately. It includes a PCL 6 printer driver and has HP postscript level 3 emulation. It comes with a black print cartridge that can print up to 5,000 pages at 5% coverage. A typical business letter has 5% coverage.. The memory is expandable to 224 MB. Also, this model comes standard with highcapacity color print cartridges that can print up to 4,000 pages at 5% coverage. This model features rated memorycard slots as well. Most documents can be printed with the standard For HP supplies only.

The label also contains power rating and regulatory information. Not all software is available in all languages. See the device getting started guide for installation instructions, and see the Readme file for the latest software information. If the user does not have access to the Internet, see Ordering parts and supplies. Full software installation is available only for Windows 2000 and Windows XP systems that meet the recommended system requirements. Not specific to this device. Some features such as custom paper sizes and page orientation might also be available in the program that is being used to create a file. Change settings in the program, if possible, because changes that are made in the program override changes that are made in the printer driver. To open a Windows print driver, complete the following steps A dialog box opens. For more information about HP Toolbox, see HP

Toolbox. For more information about the HP Scanning software, see the software online Help. See Ordering parts and supplies or the flyer that came in the device box. See the Readme file for additional release information. See the device getting started guide for installation instructions, and see the Readme file for the latest software information. For help using the printer driver, see Using Help. Certain device features are not available in this printer driver. These Help dialog boxes give detailed information about the specific printer driver. Help for the printer driver is separate from the Help for the software program. Use the Apple LaserWriter 8 driver that came with the Macintosh computer. For Mac OS 10.2 and 10.3, use the Print Center to print. When the document is loaded into the automatic document feeder ADF and the computer is connected directly to the device, HP Director appears on the computer screen to initiate faxing or scanning, or to change settings on the device through the Macintosh Configure Device application.

<https://www.ecopol.com/images/brother-em-530-typewriter-user-s-manual.pdf>

Type the device IP address in a Web browser to display the device EWS homepage in the browser. From the homepage, you can use the tabs and left navigation menu to check the status of the device, configure the device, or check the status of the supplies. For more information about the minimum requirements, see the box in which the device was packed. Select this option to install the software needed to print and scan from your computer, plus the following programs. With HP Toolbox, you have desktop access to the device fax phone book and logs. It also includes programs for scanning and for producing creative projects, such as brochures and flyers. You will not be able to scan from the device, however. For the HP Color LaserJet 2840 allinone printer, scanner, fax, copier, the minimum installation also allows you to view memory cards in the device from Windows Explorer. This method does not require you to have the software CD. This will damage the device and void the product warranty. See for current information. See for current information. The specified tolerances do not include variation in the media dimensions from nominal. All vertical lines will be parallel to the reference, or left edge of the media, within the specifications. Verify that the paper is of good quality and is free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, curls, and bent edges. The capacity of trays and bins can vary depending on media weight and thickness and environmental conditions. Use only transparencies that are designed for use with HP Color LaserJet printers. Inkjet and monochrome transparencies are not supported for this device. Do not use inkjet photo media, which can melt and damage the device. Check the printer driver for supported sizes. Check the printer driver for supported sizes. This problem might be the result of improper handling, unacceptable temperature and humidity levels, or other variables over which HewlettPackard has no control.

For ordering information, see Ordering parts and supplies. This repair is not covered by the HewlettPackard warranty or service agreements. Properties such as weight, composition, grain, and moisture content Media that does not meet the guidelines outlined in this manual can cause the following problems The table below shows the print speed for various media types. Remember that paper is hygroscopic; it absorbs and loses moisture rapidly. Heat causes the moisture in paper to evaporate, while cold causes it to condense on the sheets. Heating systems and air conditioners remove most of the humidity from a room. As paper is opened and used, it loses moisture, causing streaks and smudging. Humid weather or water coolers can cause the humidity to increase in a room. As paper is opened and used it absorbs any excess moisture, causing light print and dropouts. Also, as paper loses and gains moisture it can distort. This issue can cause jams. Paper storage environmental conditions directly affect the feed operation and print quality. Paper stored for long periods can experience heat and moisture extremes, which can cause damage. Planning is important to prevent damage to a large supply of paper. Opened packages of paper have more potential for environmental damage, especially if they are not wrapped with a moistureproof barrier. The

following guidelines should be helpful when evaluating the storage environment. If the device environment is subject to extremes, unwrap only the amount of paper to be used to prevent unwanted moisture changes. Select the type of envelope that you are using from the Print dialog box or the printer driver. Envelopes should be stored flat. If air is trapped in an envelope and creates an air bubble, then the envelope might wrinkle during printing. Envelope fold lines can vary considerably, not only between manufacturers, but also within a box from the same manufacturer.

Successful printing on envelopes When selecting envelopes, consider the following components. Be sure the seam extends all the way to the corner of the envelope as shown in the illustration. The extra flaps and strips might cause wrinkling, creasing, or even jams and might damage the fuser. To prevent serious jams, always use tray 1 to print on labels and always use the straightthrough paper path. Never print on the same sheet of labels more than once or print on a partial sheet of labels. Labels can peel off sheets with spaces between the labels, causing serious jams. Select Transparencies from the Print dialog box or the printer driver. If HP receives notice of such defects during the warranty period, HP will, at its option, either repair or replace products which prove to be defective. Replacement products may be either new or equivalent in performance to new. If HP receives notice of such defects during the warranty period, HP will replace software which does not execute its programming instructions due to such defects. If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, you will be entitled to a refund of the purchase price upon prompt return of the product. At HP's option, HP will either replace products that prove to be defective or refund your purchase price. Color print cartridges yellow, cyan, and magenta will print 2,000 pages each, and highcapacity color print cartridges yellow, cyan, and magenta will print 4,000 pages each. These estimates are only approximate; usage conditions and print patterns can cause results to vary. HP also cannot predict the longterm reliability effect on the product from using different toner formulations found in refilled cartridges. HP has no control over the actual print quality of a refilled cartridge. Multilingual program information and instructions are included in every new HP LaserJet print cartridge and supplies package.

Remaining materials are separated and converted into raw materials for use by other industries to make a variety of useful products. Simply bundle two or more cartridges together and use the single, prepaid, preaddressed UPS label that is supplied in the package that the new cartridge comes in. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures. On the back of this equipment is a label that contains, among other information, the FCC registration number and ringer equivalence number REN for this equipment. If requested, this information must be provided to the telephone company. The REN is used to determine the quantity of devices which may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all, areas, the sum of the RENs should not exceed five 5.0. To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company to determine the maximum REN for the calling area. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. This equipment cannot be used on telephone company provided coin service. Connection to Party Line Service is subject to state tariffs.

If this equipment causes harm to the telephone network, the telephone company will notify you in

advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary. The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications in order to maintain uninterrupted service. If trouble is experienced with this equipment, please see the numbers in the front of this manual for repair and or warranty information. If the trouble is causing harm to the telephone network, the telephone company may request you remove the equipment from the network until the problem is resolved. The following repairs can be done by the customer Replace any original equipment that came with the device. This includes the print cartridge, the supports for trays and bins, the power cord, and the telephone cord. It is recommended that the customer install an AC surge arrester in the AC outlet to which this This is to avoid damage to the equipment caused by local lightning strikes and other electrical surges. For more details, see Declaration of Conformity issued by the manufacturer in another section of this manual. However, due to differences between individual national PSTNs, the product may not guarantee unconditional assurance of successful operation on every PSTN termination point. Network compatibility depends on the correct setting being selected by the customer in preparation of its connection to the PSTN. Please follow the instructions provided in the user manual. Connecting to a PSTN termination point may be the subject of additional requirements set out by the local PSTN operator.

It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecoms network services. This certification means the equipment meets certain telecommunications network protective, operational, and safety requirements as prescribed in the appropriate Terminal Equipment Technical Requirement document Before installing this equipment, users should ensure that it is permissible for the equipment to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. Users should This precaution can be particularly important in rural areas. The Ringer Equivalence Number REN of this device is 0.7. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Number of all the devices does not exceed five 5.0. The standard connecting arrangement code telephone jack type for equipment with direct connections to the telephone network is CA11A. Operation is subject to the following two Conditions 1 this device may not cause harmful interference, and 2 this device must accept any interference received, including interference that may cause undesired operation. This number should not be confused with the marketing name or the product numbers.

Operation is subject to the following two Conditions 1 this device may not cause harmful interference, and 2 this device must accept any interference received, including interference that may cause undesired operation. This number should not be confused with the marketing name or the product numbers. Compliance is mandatory for products marketed in the United States. Help out by taking, editing, or uploading new ones! It is not managed by iFixit staff. Though removing the cover makes it easier, it is not a required step. Apparently you can take apart the 930C 932C 950C and 952C using similar methods. I was able to clean my DeskJet 970 cxi, because the waste ink leaked off the reservoir, as I transported the printer upside down I've only got two additions, that I

commented within the steps.
