These tools are distinguished by the combination of high quality, latest technology, comfortable design and good price. He was an innovator and made a lot of technological discoveries. Robert Bosch also was very active in social field as a philanthropist. He established a hospital, was first businessman, who started to use 8 hour shift rule in his factories and made a lot more to make everyone's life better. Auto components make up about 60 % from all corporation turnover. This figure perfectly illustrates the company's passion for innovation. Particular attention now is focused on battery technology development. Budapest, Bokor utca 911. 40089 Bosch 600W Compact Drill PSB 600 RE Green. I installed some rawlplugs the other day, and everything went well. The symbols e.g. drill or hammer take a bit of getting used to, as they aren't obvious without the instructions and the hammer action doesn't come into play until you are pressing it against something. The biggest letdown is the pathetic depth stop plastic, slightly warped from new, and I don't think it's good enough for the job. It should be made of solid metal and be non-slip. As it is, using it, drilling has to be slow and careful, so that you don't drill too deep by putting too much pressure on the stop and bending it or pushing it

through its clamp, which shouldn't be possible but is. One might fault the drill for containing rather a lot of plastic in general. Otoh, modern plastics are often as tough as metal, but a lot safer where electricity is concerned. <http://christianhohmann.com/userfiles/compaq-evo-n600c-manual.xml>

You don't get any drill bits that might have been a nice extra. However, I have used this on a fence and gate building session with mixed results. As a Bosch product it is a solid piece of kit with the exception of the outrageously crappy plastic depth gauge. My one issue is the keyless chuck which I shall comment on later in this review. The variable speed is great and I love this feature, speed being controlled with the top dial and finger pressure on the trigger. Using a variety of bits on timber equals no problems and a pleasure to use, absolutely no problems with timber drilling. Drilling concrete and brick is a different matter. The keyless chuck has failed to grip the bit, not big ones either as the most problematic has been a 6mm bit. I tried other 6mm bits on the off chance that it was a bit issue in some way but once again the keyless chuck slipped or loosened several times. The most frustrating thing about this is that the keyless chuck actually clicks when wound tight onto the bit and appears to lock up tight just right and thus gives a false sense of it being correct. What makes it worse is that the actual brick and concrete use was only about 10% of the use to date with a 50% loosening rate. Overall, at the moment, I am off the mind that a less expensive product would achieve the same results. Please try again later. Adam 3.0 out of 5 stars Masonry appears to be too broad a term for what this could handle. Its effectively brick and breeze block at best. Which I haven't tried. I have however tried concrete. This was as good as useless. It managed 3cms in 10 minutes at 16mm. At this point, I gave up and bought a titan sds drill for 40 less with bits. This did the rest of the hole in 10 seconds. I had thought I needed an sds drill for my jobs, but had been swayed by reviews on here and already having the bits I needed for a 13mm chuck. On a positive note, I didn't get the problems others had with a slipping bit. It was taking some punishment. I did have trouble removing it afterwards though. It was stuck fast. I needed to use a rubber glove to hold the chuck while putting it on reverse. In conclusion. I can't see anyone needing this drill. A lower model would do the tasks I'll now use this one for and an sds drill is the correct thing to use for masonry. Please try again later. Please try again later. Fuficius Fango 4.0 out of 5 stars I intend to use it mainly for wood, with only occasional forays into brick. I installed some rawlplugs the other day, and everything went well. The symbols e.g.

I suspect the switch or speed controllers has failed. To cap it off as my worst ever electrical purchase Bosch say they cannot repair it. Ive hardly used it as for most normal jobs I use a cordless, I wanted this for the odd job where I have to drill something thick. By contrast the Makita that I got second hand in 1983 is still running. Please try again later. Please try again later. Jim 5.0 out of 5 stars Ill need to keep an eye on that. As I say though, despite those niggles, its become my go to drill. Please try again later. Please try again later. mark a 5.0 out of 5 stars Lots of power unlike some of the cordless drills I have used. Nb. it is fairly heavy because of the powerful motor the front handle is quite useful for steadying it. Not quite so useful for fixing screws due to its size and weight makes it a bit more unwieldy than smaller cordless drills but would be good for driving home really big screws. Please try again later. Please try again later. Graham 5.

0 out of 5 stars All my power tools are now Bosch and are proving to be well made and reliable. Having said that, the chuck of the drill did seize up after about 6 months and Bosch replaced the chuck without fuss, free of charge within days. No problems at all since then. Highly recommended. Please try again later. Please try again later. Mehmet 5.0 out of 5 stars Its very powerful and works well. Its not the Bosch blue line but for the price you cannot fault it. Just stay away from those and buy this one if you dont need the professional Bosch Blue. Of course stay away from Black and Decker as well! Please try again later. Please try again later. James Page 5.0 out of 5 stars Lots of power, Drills through anything with ease, super quality. Great feel. Professional use. Highly recommend. Compliments to Bosch and Amazon. Excellent service. Thank You. Please try again later. Please try again later. N Gordon 5.0 out of 5 stars It has 1000 watt motor with an excellent hammer action that penetrates into the hardness building materials like facing brick or concrete. My other drill was a 700watt motor which struggled on hard materials, the extra 300 watts and the increased hammer action makes the increased performance. I love Bosch equipment its always well made so you know that your buying good products. Please try again later. Please try again later. You can edit your question or post anyway. If necessary please familiarise yourself with them prior to bidding on items in this sale. Please take care when placing a bid, as once your bid is placed it cannot be altered or withdrawn. Graysonline will not be organising transport of goods. Please consider this prior to bidding. Most lots have pictures assigned to them. These should be taken as a guide only. In bidding in this sale, the buyer agrees without reservation to GraysOnline doing so. Please note that personal or company cheques will not be accepted. To assist in the processing of payments please have funds available. All ORPs are prices supplied by the manufacturer or retailer of the item at the time of the items original sale, and therefore such ORPs may not be current at the time of the online auction of the item. Graysonline takes no responsibility for the display of ORPs on any item it offers for sale at an online auction on its site, and hereby advises all bidders to satisfy themselves as to the value of the item

being auctioned. A summary of these types of enforceable requirements is as follows. There are some exceptions to this, however, if there are any successful bids on a particular lot within 10 minutes of the close of the online auction the "Going, Going, Gone. There is no limit to the number of times an online auction can be extended. This makes GraysOnline work more like a live auction where the bidding doesn't stop as long as there is still interest in the product, rather than assigning an arbitrary cutoff time. This means it is a good idea to watch the action as the auction nears closing time and to check back often. Bids on assets in this sale should be made based on your inspection and assessment of the goods. Descriptions and photographs should be used as a guide only. If you are unsure do not bid as no refunds will be given. The removal of the goods is the buyers responsibility. Assets are to be collected from Unit 11, 4 Dunlop Court, Bayswater, Victoria.

In order to manage and minimise site risks. JSAs and contractor requirements forms are to be submitted before work is started on site. Alternatively GraysOnline have prequalified the following contractors to perform removal work on site. Purchasers cannot pick up until full invoice is paid. Once assets are removed the transaction between GraysOnline and the bidder is deemed complete. There will be no recourse beyond this time, even in the event of third party collections. If you are unsure please refrain from bidding.
