I started this as a comment on a different thread, it was supposed to be a few tips by checkpoint but turned into a light guide.A couple tips; its a very easy raid, it just takes repetition for each player to understand their given role and execute it. I've done the raid multiple times with fresh players and the experience is the same every time. In the beginning it feels almost unwinnable, then it clicks, we get it, and they all talk about how easy it really is. Calus is the hardest part due to bugs and people getting used to the phase world but its still the same principle; do it a bunch and it becomes easy. HereeAAAAs some Check point by check point tips.First of all you get one revive token per attempt. This is located at the bottom right of your screen. Once you have revived a teammate you can no longer revive anyone that attempt.eAAAKeys/StandardseAAA have four people guard home plate while two people go off to collect the standard. The first standard grab can be more people as there are no standards to guard but its just as easy to have four people stay at home plate and handle adds. Rockets with clusters and shot guns are handy for quickly killing orange bars. Make sure the people guarding the home Looking at the text à € eœa councilman would appear this will be a psion floating in a bubble, when he is above adds will gain an immune to damage shield. He ran to the prism and melee for a shot and drops the shields. I think this happens after a pattern is grabbed. Since three standards are knocked at home the door is open and you can move to the next point of verification. À € œBaths/Bathersà € I suggest rifles to deal with bathers. I also recommend 3 on each side rotate with each other. One on each plate and 2 in the middle. People who start in the middle immediately rotate with the selected player on their side, that person goes in the middle, throws a swim in Adds, grabs the buff and runs to the next person. This person gets in the middle, throws a swim, grabs buff, and goes to the person who changed first. Rinse and repeat to hear the Chime for the damage phase. Since the damage phase begins everyone goes in the middle, having a stormcaller or arcstaff pop super and managing adds while everyone kills wires. Everyone starts in a whole and working in the hourly sense. Pay attention to your buff timer and add, always have a person in additions for them to be a shot you. Warlocks Cure of Slitting is very much here. Once your buff where you are out of the middle, the councilman who appears on the motherboard, killing the projection that appears in the same day, then everyone back to his plates , rinse and repeat. When on individual plates, be sure to stay upon them all the time unless you will die. Staying in the plates is which increases the wires and begins the damage phase. The cold heart is good for the damage phase, but of limited use outside it. here. 4 people below with flowers, 2 people on top with crystals. It is good here to have someone experienced lead the people below. Hall ways to that make it easier to avoid dogs. To start start starting All dwarfs, then the crystals appear, the capture of both crystals will begin the meeting. Before you start running and locate all the € à à € flowers. The distant cories (Close is near the safe room, far away from entrance) People on the top grabs crystals and separate on either side, looking for which flowers are shining. The calls that I I'm going to are l1 l2 l3 tree (dio) r1 r2 r3 and crack (between the right rocks) as soon as the flowers are identified for people in low motion as a group for the first flower chosen, usually l1 or R1, depending on spawns. Make sure that all people are around the flower at the same time, the person at the top throws in the flower with the crystal to burst and give the chandelier. The person with the crystal must be in Light bundle to shoot the crystal. After the flower is stamped, the lowest people come to the flower. As soon as the flower is and Stourada, an Add Sparra on either side, the crystal brackets melt them with the crystals, they are elite shooters and they hurt, then melt them quickly. You have a limited time of time to get the highest possible buff batteries before the "senra" swallows. After being seen or angry, the damage phase begins. During the damage phase, each cion runs to your flower and starts to upload. If you have 3-4 batteries, you may easily kill each con in a phase of damage. If you notice certain people who fight, someone designated to run for them soon after the death of the cran and help to end them. You can play with security and cause vain damage. If you are looking for vain damage phases, make sure everyone goes back to the safe room before the Cats finish the howl.
